

PRESS Release: IFSEA Awards Pitco the 1st Gold Seal Approval during NAFEM

I would like to congratulate Pitco on achieving the first ever IFSEA Gold Seal Approval for your Solstice Rethermalizers.

There is no “Consumer Reports” for the food service industry, and so the IFSEA Gold Seal will stand as a beacon for the purchase of high quality foodservice equipment.

For 104 years, IFSEA has promoted and rewarded the highest level of professionalism, as evidenced by our almost 50-year affiliation with the Armed Forces to determine the best food service operators in the Army, Navy, Marine Corps, Coast Guard, Military Sealift Command, and Air Force. We bring that expertise to the approval process for food service equipment. Thus, you can be extremely proud of having received the first Gold Seal from the first hospitality association in America. David E. Kinney, DODG, DFE

Congratulations on an outstanding job with everything, from helping put the program together, to preparing for the factory visit, to the great treatment and food you gave us, and to the tremendous strides you have made for Pitco in such a short while. Absolutely a great company, wonderful people, obviously very well managed, and on the move. We had a ball, and there was no question that the Solstice Water Rethermalizers met the test.

I have put a slide show together on the web at www.ifsea.com/GoldSeal-Pitco.ppt

We are very proud to have this program underway, and thank you for thinking of IFSEA for this project, and for stepping up for the inaugural visit.
